

I am a results-driven Full Stack Developer with a strong interest in both front-end and back-end development. I have a proven skill set in building interactive, responsive, and scalable web applications using modern web technologies. My passion lies in solving real-world problems through clean and efficient code, and I strive for continuous learning in full-stack development. I am eager to contribute to innovative projects, collaborate effectively, and deliver high-quality software solutions

EDUCATION

B.E (Computer Science and Engineering) , Kamaraj College of Engineering and Technology	2022 – 2026
CGPA: 8.19	
HSE , St.Mary's Higher Secondary School	2022
Score: 87%	
SSLC , St.Mary's Higher Secondary School	2020
Score: 89%	

SKILLS

Languages:	Java,Python, HTML, JavaScript
Frameworks:	React.js,Node.js, Express.js,SQL,MongoDb
Design:	Tailwind CSS,CSS, Canva, Figma
AI Tools:	ChatGPT, Claude AI, Perplexity, GitHub Copilot

TECHNICAL EXPERIENCE

Web Development Intern Kevell Guru Technologies	Dec 2023
- Successfully developed a College Application Portal Clone project using HTML, CSS, and JavaScript. - Built a responsive front-end interface with dynamic content and real-time interactions. - Completed a 1-month internship focused on enhancing user experience and web development skills.	
Machine Learning Intern Winways Private Ltd	May 2024
- Successfully developed a Fraud Detection System project using Python and Machine Learning. - Worked with real-world datasets involving data preprocessing and model development. - Completed a 1-month internship focused on practical machine learning implementation.	
Full Stack Intern Techmango Pvt Ltd	Dec 2025
- Worked on full-stack web development projects using React.js, Node.js, and Express.js. - Developed an E-Commerce web application with features including product listing, user authentication, shopping cart, and order management. - Utilized Claude AI for backend development assistance, API integration, and project enhancement during development. - Collaborated with the development team to improve application performance and user experience.	

PROJECTS

- Food E-Commerce Platform**
Developed a modern food e-commerce web application using the MERN stack, Tailwind CSS, and responsive UI design principles. Implemented product browsing, shopping cart, authentication, and dynamic frontend features with the assistance of AI tools like GitHub Copilot for faster development and code optimization.
- ReactJS & Node.js Quiz Application**
Built a full-stack quiz application using React.js for the front-end and Node.js for the back-end. Implemented user authentication, score calculation, timer functionality, and dynamic question management with the support of GitHub Copilot for code suggestions and development efficiency.
- AI Quiz Generator Using NLP**
Built an AI-powered quiz generation web application using React.js, Vite, Tailwind CSS, and basic NLP (Natural Language Processing) techniques to convert uploaded notes, PDFs, and text into interactive quizzes such as MCQs and fill-in-the-blanks through automated text analysis.
- FarmToHome - Organic Product Delivery Platform**
Developed a responsive full-stack organic product delivery web application using React.js, Node.js, Express.js, and MongoDB. Implemented product browsing, cart management, user authentication, order placement, and modern responsive UI features for seamless farm-to-customer online shopping experience.
