

I am a results-driven Full Stack Developer with a strong interest in both front-end and back-end development. I have a proven skill set in building interactive, responsive, and scalable web applications using modern web technologies. My passion lies in solving real-world problems through clean and efficient code, and I strive for continuous learning in full-stack development. I am eager to contribute to innovative projects, collaborate effectively, and deliver high-quality software solutions

EDUCATION

B.E (Computer Science and Engineering) , <i>Kamaraj College of Engineering and Technology</i>	2022 – 2026
CGPA: 8.19	
HSE , <i>St.Mary's Higher Secondary School</i>	2022
Score: 87%	
SSLC , <i>St.Mary's Higher Secondary School</i>	2020
Score: 89%	

SKILLS

Languages:	Java, HTML, Tailwind CSS, JavaScript
Frameworks:	React.js, Node.js, Express.js
Tools:	VS Code, GitHub, Canva, Figma
AI Tools:	ChatGPT, Claude AI, Perplexity, GitHub Copilot

TECHNICAL EXPERIENCE

Web Development Intern <i>Kevell Guru Technologies</i>	Dec 2023
- Successfully developed a College Application Portal Clone project using HTML, CSS, and JavaScript. - Built a responsive front-end interface with dynamic content and real-time interactions. - Completed a 1-month internship focused on enhancing user experience and web development skills.	
Machine Learning Intern <i>Winways Private Ltd</i>	May 2024
- Successfully developed a Fraud Detection System project using Python and Machine Learning. - Worked with real-world datasets involving data preprocessing and model development. - Completed a 1-month internship focused on practical machine learning implementation.	
Full Stack Intern <i>Techmango Pvt Ltd</i>	Dec 2025
- Worked on full-stack web development projects using React.js, Node.js, and Express.js. - Developed an E-Commerce web application with features including product listing, user authentication, shopping cart, and order management. - Utilized Claude AI for backend development assistance, API integration, and project enhancement during development. - Collaborated with the development team to improve application performance and user experience.	

PROJECTS

- Vegetable Price Prediction Using Machine Learning Algorithms**
Developed a machine learning model to predict vegetable prices using historical market datasets. Implemented data preprocessing, feature selection, and prediction algorithms to improve forecasting accuracy with the assistance of ChatGPT for model optimization and debugging.
- ReactJS & Node.js Quiz Application**
Built a full-stack quiz application using React.js for the front-end and Node.js for the back-end. Implemented user authentication, score calculation, timer functionality, and dynamic question management with the support of GitHub Copilot for code suggestions and development efficiency.
- Interactive Chatbot Using React and API**
Created an interactive AI chatbot interface using React.js integrated with external APIs. Designed a responsive UI with real-time message handling and API-based automated responses using Perplexity for API research and implementation guidance.
- E-Commerce Client-Server Full Stack Application**
Developed a full-stack e-commerce web application using React.js, Node.js, and Express.js. Implemented product listing, shopping cart, user authentication, order management, and responsive client-server communication with REST APIs using Claude AI for backend logic assistance and project enhancement.
